NATIVE HAWAIIAN GARDEN EXPERIENCE

The Garden displays native and introduced plants that the ancient Hawaiian people used in daily life. Many plants you will find in the Garden thrive in the wild, but some have become rare or endangered in their natural habitats. The plants are displayed in three zones: coastal plants which thrive along sandy shorelines, "canoe plants" which were possibly brought here by the Islands' first settlers, and dry-forest plants.

Visitors to Bishop Museum are permitted to photograph and videotape our exhibits, unless otherwise noted. Photography and videotaping for commercial use must be coordinated by calling (808) 847-8274.
